Wally notes that all of these crops should be highly marketable in most areas. Over time, SPIN farmers develop and streamline their own crop repertoires to suit their own growing and marketing conditions, and that is part of the fun of growing. He urges every SPIN farmer to try their own s-small p-lot in-troductions, by experimenting with new crops every year. At market, his hands down winners have been rainbow carrots and pea shoots. His biggest flop at market has been Asian greens.
